DEVICE

(57) Abstract:

PURPOSE: To provide a capsule endoscopic device capable of lessening the burden of a patent without restraining the patient's mouth, nose, etc., at all during inspection.

CONSTITUTION: This capsule endoscopic device 1 has a self-traveling part 2 having an image pick-up means which is inserted into the celom and is used to observe at least the inside of the body and a power source part 5 which supplies energy. The capsule endoscopic device 1 is provided with a balloon 20 for fixing part of the device in the celom. This balloon 2c and the self-traveling part 2 are connected by a flexible cable 6 in such a manner that the self-traveling part 2 having the image pickup means is advanced and retreated into and out of the fixing part in the celom.
